COMPANY OVERVIEW

Your corridor to Cameroon, CEMAC and Southern Africa

PAGE Group operates through two companies: PAGE International Limited in Douala, Cameroon — the main corridor for businesses and investors entering Cameroon and the wider CEMAC zone (Cameroon, Gabon, Congo, Chad, the Central African Republic and Equatorial Guinea) — and PAGE INDUSTRIES (PTY) LTD in Johannesburg, South Africa, serving Southern Africa.

From Bonabéri, Douala, at the heart of Central Africa's principal port city, and from Johannesburg, the group brings five complementary business divisions under one roof: international trade and export consulting, industrial procurement, oil and commodities brokerage, maritime and shipyard services, and investments and business development. Clients work with a single accountable partner on the ground, rather than coordinating several unconnected intermediaries.

Our approach is practical: verify before committing funds, document every step, and keep clients informed from first enquiry to delivery and follow-up.

Our vision

To be the trusted gateway through which international companies and investors access, trade with and build in Central Africa.

Our mission

To connect markets and build industries by delivering reliable trade, procurement, commodities, maritime and investment services with integrity, local knowledge and professional execution.

Our values

Integrity
Transparent terms, verified partners and honest reporting.

Reliability
Clear commitments and disciplined follow-through.

Local knowledge
On-the-ground presence in Douala and Johannesburg.

Partnership
Long-term relationships built on shared success.

Our five divisions

01 International Trade & Export Consulting
Trade facilitation, export and import consulting, market access and commercial negotiations.

02 Industrial Procurement & Solutions
Sourcing of machinery, equipment, industrial materials and construction aggregates.

03 Oil & Commodities Brokerage

Facilitating oil, petroleum product deals and other commodity transactions.

04 Maritime & Shipyard Services

Vessel repair and maintenance, marine engineering, fabrication and dry-dock services.

05 Investments & Business Development

Investment advisory, market entry, startup support and corporate services.

DIVISION 01

International Trade & Export Consulting

Trade facilitation, export and import consulting, market access and commercial negotiations.

Your Gateway to Cameroon & CEMAC Markets

We help global companies and investors confidently navigate the Cameroonian market with verification, auditing and proxy support — and help local producers reach buyers abroad. From sourcing to documentation, we connect markets.

Cameroon sits at the crossroads of West and Central Africa. The Port of Douala is the main maritime entry point not only for Cameroon but for neighbouring landlocked markets such as Chad and the Central African Republic. PAGE International uses this position to act as a practical trade corridor for companies buying from, selling to, or moving goods through the CEMAC zone.

For foreign companies, we reduce the risk of trading with partners you have never met: we verify suppliers, inspect goods, audit documentation and represent you locally. For Cameroonian and regional producers, we help prepare products, paperwork and pricing for export buyers abroad.

Why work with us

Market Access

Local presence in Douala with reach across the CEMAC zone.

Verified Partners

Supplier and buyer verification before you commit.

Proxy Support

On-the-ground representation for foreign companies.

OUR SERVICES

What we deliver

Import & Export Facilitation

Coordination of orders, inspections, shipping, customs paperwork and onward delivery, so one team manages the flow from origin to destination.

Export Consulting

Advice on target markets, pricing, packaging, product standards and export regulations to help local producers become export-ready.

Buyer & Supplier Matching

We identify and screen counterparties, check their standing and introduce you only to partners that fit your volumes and requirements.

Proxy Sourcing

Acting as your eyes and hands in Cameroon: sourcing products, visiting suppliers, verifying quality and auditing before payment or shipment.

Trade Documentation

Help preparing and checking commercial contracts, invoices, certificates of origin, phytosanitary certificates and shipping documents.

Market Intelligence & Negotiation

Local insight on prices, demand and regulations, and representation during commercial negotiations on your behalf.

THE CEMAC CORRIDOR

Your Trade Corridor into Central Africa

Goods entering or leaving the CEMAC zone very often pass through Douala. Having a trusted partner on the ground there shortens timelines and reduces costly mistakes.

- Local presence at the port city of Douala
- Access to Cameroon and wider CEMAC markets
- Verification before you commit funds
- One point of contact from sourcing to delivery

How we work

01 Enquiry & Brief

Share your requirements, volumes and timeline.

02 Assessment

We review feasibility, sources and compliance needs.

03 Proposal

A clear proposal with scope, terms and schedule.

04 Execution

Coordinated delivery with ongoing oversight.

05 Follow-up

Handover, documentation and continued support.

Sectors We Support

Agricultural commodities · Cocoa & coffee · Timber & raw materials · Manufactured goods · Industrial inputs · Consumer goods

Frequently asked questions

Can you verify a supplier in Cameroon before I pay?

Yes. We can visit the supplier, check their documents and inspect goods, then report back before you release payment.

Do you only work with Cameroonian companies?

No. We work with foreign companies trading into the CEMAC zone and with local producers selling abroad.

Which products do you handle?

Mainly agricultural commodities, timber and raw materials, industrial inputs and manufactured goods. Contact us about other products.

DIVISION 02

Industrial Procurement & Solutions

Sourcing of machinery, equipment, industrial materials and construction aggregates.

Reliable Sourcing for Industry & Infrastructure

We source heavy equipment, machinery, spare parts and materials for industrial and infrastructure projects. Through our construction and aggregates operations we are producers, not brokers — managing quarry sites, crushing facilities and transport for consistent quality and on-time delivery.

Industrial and infrastructure projects in Central Africa often stall because equipment, parts or materials arrive late, are wrong, or cost far more than planned. PAGE International manages procurement from specification to delivery on site, coordinating suppliers, shipping, clearance and inland transport.

Unlike a pure trading company, we also produce. Through our own quarries, crushing facilities and transport fleet we supply construction aggregates, sand and concrete directly, giving clients consistent quality and dependable delivery for building and road works.

Why work with us

Source to Site

Coordinated procurement, logistics and delivery.

Consistent Quality

Control from extraction and sourcing through to specification.

Cost Efficiency

Shorter supply chains with fewer intermediaries.

OUR SERVICES

What we deliver

Heavy Equipment Sourcing

Excavators, loaders, cranes, crushers, trucks and other heavy equipment, new or used, sourced to your specification and budget.

Industrial Machinery

Machinery for manufacturing, mining, agro-processing and processing plants, with attention to power supply, spares and local servicing.

Industrial Materials

Steel sections, plates, pipes, fittings, cables and process materials sourced in the right grade and quantity.

Spare Parts & Components

Genuine and compatible parts to keep equipment working and reduce costly downtime, including urgent orders.

Project Procurement

Full procurement packages for industrial and infrastructure projects, consolidating many suppliers into one managed supply chain.

Logistics & Technical Support

Shipping, customs clearance coordination and inland delivery, plus technical assistance on specifications and installation.

Infrastructure & Construction Materials

From our quarries to your foundation — premium industrial sand and aggregates for Cameroon's growing infrastructure, plus a full range of building materials and contracting services.

Construction Aggregates
Crushed gravel and graded aggregates.

Quarry Operations
Extraction and crushing at our own sites.

Sand & Gravel
Industrial sand for concrete and building works.

Asphalt & Express Asphalt
Road surfacing and rapid repair asphalt.

Cement & Building Materials
Cement and core building supplies.

Ready-mix Concrete
Concrete batched to specification.

Small-load Concrete
Smaller deliveries for residential works.

Mortar & Screed
Mortar and screed for finishing works.

Contracting Services
Contracting and commercial landscaping.

THE CEMAC CORRIDOR

Supplying Projects Across the CEMAC Zone

Douala is the main import gateway for industrial goods destined for Cameroon and its landlocked neighbours. We use that position to move equipment and materials efficiently to project sites.

- Producer of aggregates, not just a broker
- Own quarry sites and transport fleet
- Coordinated import, clearance and delivery
- Single accountable supplier for projects

How we work

01 Enquiry & Brief
Share your requirements, volumes and timeline.

02 Assessment
We review feasibility, sources and compliance needs.

03 Proposal
A clear proposal with scope, terms and schedule.

04 Execution
Coordinated delivery with ongoing oversight.

05 Follow-up
Handover, documentation and continued support.

Industries We Support

Construction & infrastructure · Mining & aggregates · Manufacturing · Energy · Ports & logistics · Agro-industry

Frequently asked questions

Can you deliver construction materials to my site?

Yes. We deliver aggregates, sand, concrete and building materials with our own transport.

Do you source used equipment?

Yes, alongside new equipment, depending on your budget and requirements.

What information do you need for a quote?

The product or equipment, technical specifications, quantity, delivery location and timeline. Drawings or datasheets help.

DIVISION 03

Oil & Commodities Brokerage

Facilitating oil, petroleum product deals and other commodity transactions.

Structured, Transparent Commodity Transactions

We facilitate transactions in crude oil, refined petroleum products and other commodities by matching qualified buyers and sellers and supporting each step of the deal.

Commodity deals depend on trust, documentation and timing. PAGE International brings structure to oil, petroleum product and commodity transactions by screening counterparties, clarifying terms and coordinating each step between offer and delivery.

We focus on genuine, verifiable transactions. Our role is to connect serious buyers with serious sellers, support due diligence and keep communication clear so deals can close safely.

Why work with us

Qualified Counterparties

Buyer and supplier screening before engagement.

Transaction Support

Coordination from offer through to delivery.

Market Insight

Pricing and market intelligence to inform decisions.

OUR SERVICES

What we deliver

Oil Brokerage

Facilitation of crude oil transactions between qualified sellers and buyers, from initial enquiry through to contract.

Petroleum Products

Supply facilitation for diesel (AGO), gasoline (PMS), jet fuel, LPG and other products for distributors and industrial users.

Refined Products

Sourcing and placement of refined products with attention to specifications, quantities and delivery terms.

Commodity Transactions

Support for agricultural and industrial commodity deals, including cocoa, coffee, timber and other raw materials.

Buyer & Supplier Matching

Screening and introductions so you deal only with counterparties who can perform.

Market Intelligence

Information on pricing, supply and demand to help you decide when and how to trade.

THE CEMAC CORRIDOR

Connecting Central African Supply and Demand

The CEMAC region both produces and imports energy and raw materials. From Douala, we help international and regional players meet and transact with confidence.

- Counterparty screening before engagement
- Clear, documented transaction steps
- Regional knowledge of the CEMAC market
- Confidential handling of enquiries

How we work

01 Enquiry & Brief
Share your requirements, volumes and timeline.

02 Assessment
We review feasibility, sources and compliance needs.

03 Proposal
A clear proposal with scope, terms and schedule.

04 Execution
Coordinated delivery with ongoing oversight.

05 Follow-up
Handover, documentation and continued support.

Products We Handle

Crude oil · Diesel (AGO) · Gasoline (PMS) · Jet fuel · LPG · Agricultural commodities

Frequently asked questions

Do you hold product stock?
We act as a broker and facilitator, connecting verified buyers and sellers rather than holding stock ourselves.

What do I need to submit an enquiry?
Product, specification, quantity, delivery terms and destination, plus your company details.

Are enquiries kept confidential?
Yes. Information you share is used only to assess and progress your transaction.

DIVISION 04

Maritime & Shipyard Services

Vessel repair and maintenance, marine engineering, fabrication and dry-dock services.

Reliable Maritime & Shipyard Solutions

We provide shipyard and marine engineering services for commercial, industrial and service vessels, helping ship owners and operators keep their fleets safe, compliant and operational.

Every day a vessel is out of service costs its owner money. Our maritime and shipyard division helps ship owners, operators and port users keep vessels safe, compliant and working, with repair, maintenance, fabrication and engineering services based in Douala.

We work on commercial, industrial and service vessels operating in the Gulf of Guinea, from tugs and barges to cargo and offshore support vessels. Our teams combine marine engineering, welding and fabrication skills to handle both planned maintenance and urgent repairs.

Why work with us

Vessel Uptime

Minimise downtime with reliable repair and maintenance.

Safety & Compliance

Work aligned with international maritime standards.

Technical Expertise

Marine and industrial engineering capability.

OUR SERVICES

What we deliver

Vessel Repair & Maintenance

Planned maintenance, emergency repairs, refits and preparation for class and statutory surveys, scheduled to limit time out of service.

Marine Engineering & Piping

Work on main and auxiliary engines, pumps, shafting and mechanical systems, plus fabrication and replacement of marine piping.

Metal Fabrication

Cutting, welding and fabrication of steel structures, hull sections, tanks, brackets and deck equipment.

Shipbuilding & Conversion

Construction and assembly of small vessels and modification or conversion of existing vessels for new uses.

Dry Dock Operations

Docking, hull cleaning, blasting and painting, inspection, steel renewal and underwater-hull works.

Brokerage, Chartering & Logistics

Help finding vessels to buy or charter, and coordination of maritime logistics for cargo and project needs.

THE CEMAC CORRIDOR

Supporting the Gulf of Guinea Gateway

The Port of Douala serves Cameroon and much of Central Africa. Ship repair capacity close to that traffic keeps vessels moving and the corridor running.

- Based in Douala, close to port traffic
- Marine engineering and fabrication skills
- Planned and urgent repair support
- Work aligned with maritime safety standards

How we work

01 Enquiry & Technical Brief
Share vessel details, service needs and timeline.

02 Inspection & Assessment
On-site or technical review to define scope.

03 Quotation & Planning
Detailed proposal with work plan and resources.

04 Execution & Monitoring
Work carried out with quality and safety oversight.

05 Handover & Support
Ready-for-service vessel and follow-up support.

Types of Vessels We Support

Cargo & bulk vessels · Tankers & barges · Tugs & service vessels · Fishing vessels · Offshore & support vessels · Other commercial vessels

Frequently asked questions

What information do you need for a shipyard quote?
Vessel name and type, IMO number if any, tonnage, dimensions, current location, required work and expected arrival date.

Do you handle emergency repairs?
Yes. Contact us with the vessel's location and problem and we will assess what can be done and how quickly.

Which vessels can you work on?
Cargo and bulk vessels, tankers, barges, tugs, fishing, offshore support and other commercial vessels.

DIVISION 05

Investments & Business Development

Investment advisory, market entry, startup support and corporate services.

Invest Smart, Invest Securely in Cameroon

From due diligence to local partnerships, we provide the insights and tools investors need to succeed in Cameroon's fast-growing economy — and connect visionary entrepreneurs with funding, mentorship and strategic support across the CEMAC region.

PAGE International positions itself as a main corridor for business and investment into Cameroon and the CEMAC zone. We help investors, companies and entrepreneurs understand the market, find reliable partners and set up properly before committing capital.

Because we also run trade, procurement, commodities and maritime activities, we see the local economy from the inside. That practical experience, combined with corporate services such as incorporation, tax, payroll and staffing, lets investors move from idea to operating business with one partner.

Why work with us

Due Diligence
Verification and auditing before you invest.

Local Partnerships
Introductions to reliable local partners.

Full Corporate Support
Incorporation, tax, payroll and staffing in one place.

OUR SERVICES

What we deliver

Investment Advisory
Assessment of opportunities, market conditions, risks and partners so you can make informed investment decisions.

Corporate Market Entry
A step-by-step route into Cameroon and the CEMAC zone: structure, registration, partners, premises and first operations.

Startup Support & Funding
Mentorship, business planning and help connecting entrepreneurs with funding and strategic partners.

Company Incorporation
Business registration, legal setup and the documents needed to operate in Cameroon.

Business Process Outsourcing
Staff placement and outsourced operations so you can run locally without building every function yourself.

Tax Compliance & Filing
Tax registration, regular filing and advice to keep your business compliant.

Corporate & Business Services

Practical services that let companies set up and operate efficiently in Cameroon.

Bookkeeping & Accounting
Accurate records and financial reporting.

Payroll Management
Compliant, on-time payroll processing.

Staff Placement
Recruitment and staff placement services.

Capital Solutions
Support structuring and accessing capital.

Web Design & Hosting
Professional websites and hosting for businesses.

Business Development
Growth strategy and partnership development.

THE CEMAC CORRIDOR

The Corridor for Investment into Central Africa

The CEMAC zone shares a common currency and economic framework across Cameroon, Chad, the Central African Republic, Congo, Gabon and Equatorial Guinea. Starting in Cameroon, through Douala, gives investors a practical base for the wider region.

- Local due diligence and verification
- Introductions to reliable local partners
- Company setup and compliance in one place
- Links to trade, procurement and maritime services

How we work

01 Enquiry & Brief
Share your requirements, volumes and timeline.

02 Assessment
We review feasibility, sources and compliance needs.

03 Proposal
A clear proposal with scope, terms and schedule.

04 Execution
Coordinated delivery with ongoing oversight.

05 Follow-up
Handover, documentation and continued support.

Sectors of Opportunity

Infrastructure · Agriculture & agro-processing · Energy · Mining · Logistics · Technology & startups

Frequently asked questions

Can you help a foreign company register in Cameroon?
Yes. We handle incorporation and the related tax and administrative setup.

Do you invest directly in projects?
We advise, structure and connect investors with opportunities and partners. Tell us about your project to discuss the best approach.

Which sectors do you focus on?

Infrastructure, agriculture and agro-processing, energy, mining, logistics, and technology and startups.

PARTNERSHIP & INVESTMENT

Working with PAGE Group

Whether you are sourcing equipment, exporting goods, planning vessel works, trading commodities or exploring an investment in Cameroon, CEMAC or Southern Africa, we start with a conversation about your objectives, timeline and constraints, then propose a clear scope.

Safety notice: PAGE Group never asks for fees to unlock deals or job offers, and never changes its bank details by email alone. Always confirm through the official contacts listed at the end of this profile.

OFFICIAL CONTACTS

Let’s work together.

Discuss your trade, sourcing, commodities or investment requirements in Cameroon, CEMAC or Southern Africa. For maritime enquiries, contact PAGE International Limited in Douala.
